Brow

GROWTH NEEDLING TREATMENT KIT

**Finally
fuller eyebrows
again!**

What wouldn't we do for thicker eyebrows? Actually, it's not that difficult - with the new BrowGrowth Needling Treatment Kit!

The Kit focuses on supporting the growth of eyebrows.

The combination of microneedling on the eyebrows and the use of this BrowGrowth oil not only promotes the growth of the brows, but also strengthens the hairs and creates a natural shine.

This leads to a full but natural result. Several different oils provide extra care for the hairs and keep them moisturised, which ensures faster growth and prevents the hairs from breaking off.

PhiLaser

TYPE R 2.0

We have kept on developing and optimizing the laser, therefore we are now able to offer a pulse duration of 2 nanoseconds!

The shorter pulse shreds the particles finer and thus allows the immune cells to remove them more easily.

The PhiLaser Machine is highly effective on various skin types and incorporates the latest technology of pigment removal and at the same time, without harsh influence to the skin, is perfect to treat a wide range of skin issues.

It also performs carbon peel treatment, which is a revolutionary laser procedure intended for problematic skin and congested pores where assisted by the laser's heat energy, the carbon penetrates to the dermis, stimulating skin cells repairing and clearing pores.

New Tool holder

- Easy emptying water out of the machine
- Spanish added as operating language

The laser is used for treatments like:

- Tattoo removal
- Age spots removal
- Pigments & hyperpigmentation removal

Contains:

- 1x PhiLaser
- 1x Black Head (1320 nm)
- 1x Metal Head (1064 nm)
- 1x Green Head (532 nm)
- 1x Gun (trigger)
- 1x Foot pedal (trigger)

- 1x Water hose
- 2x Extension plug
- 1x Client glasses
- 1x Technician glasses
- 2x Carbon Gel 100ml

Technical characteristics:

Net weight: 23kg • Size: 60x45x40cm • Power Rate: 220v +/- 20%, 50Hz

PhiTattoo Black Liner

The PhiTattoo Black Liner is a black tattoo colour that is used for outer contours.

Thanks to its formula the colour does not spread in the skin and pigments do not change colour over time.

Only
for Tattoos!

PhiTattoo Black Shader

The PhiTattoo Black Shader is a black tattoo colour designed for shading. Due to the concentration of the pigments, shadows are both even and soft, but at the same time sharp.

The formula of the colour also ensures that the pigment appears regular and smooth in the skin.

PhiTattoo After Care Gel

PhiTattoo After Care Gel stops the lymph immediately during tattoos, permanent make-up and microblading and therefore prevents scabs and loss of pigment. It also helps to protect and rejuvenate the skin after it has undergone one of the mentioned treatments. In addition to its astringent properties, oak extract also helps to soothe the skin and reduce redness and swelling.

Phi NanoNumb cream is a Topical Anesthetic numbing cream with 5% Lidocaine, acting as a fast and convenient numbing agent for pain relief during various cosmetic procedures.

Temporary relief of pain and itching due to: minor burns/cuts/skin irritations, sunburns, scrapes and insect bites.

Lidocaine is one of the most popular active ingredients of local anesthetic products, because of its rapid action potential and its temporary effect, without any side effects or risks for the skin.

Phi NanoNumb is providing maximum skin comfort during a treatment, also adding moisture to the skin and preventing flaking or irritations.

PHI NUMB

Unlike some other topical anesthetics, Phi NanoNumb is easy to absorb, doesn't feel sticky, itchy or greasy.

**Full numbing effect after
around 10-20 minutes!**

PhiNesse Brushes

Brushes are obviously the most important tool for a make-up artist! The brushes don't only help the artist to apply the make-up, but also to blend it very well and spread it in such a way that the desired effect is achieved.

- The PhiNesse Brush Kit contains:**
- 17 extra soft brushes
 - Leather case
 - Foundation sponge
 - Powder puff

The contents of the kit are easy to store, so that you always have all your make-up tools at hand, wherever your schedule takes you.

Super pigments

The development of our SUPER pigments lasted for years.

Anyone who is aware of the pigmentation process understands that with every new pigmentation we apply an implant in the organism. The organism recognizes a part of the pigment as a foreign body, so the pigment may fade but it will stay there forever. This is why our preceding vision was to make extremely clean and extremely stabile pigments.

After a long time of research and dedication, PHIBROWS SUPER IS FINALLY HERE! This formula is setting completely new standards not only in the field of the Microblading and Permanent Makeup – but also in the field of tattoos.

- › Clean & extremely stable pigment
- › Non magnetized
- › Formula that is not seen as foreign body by human organisms
- › True to color even on oily skin
- › Shorter healing time

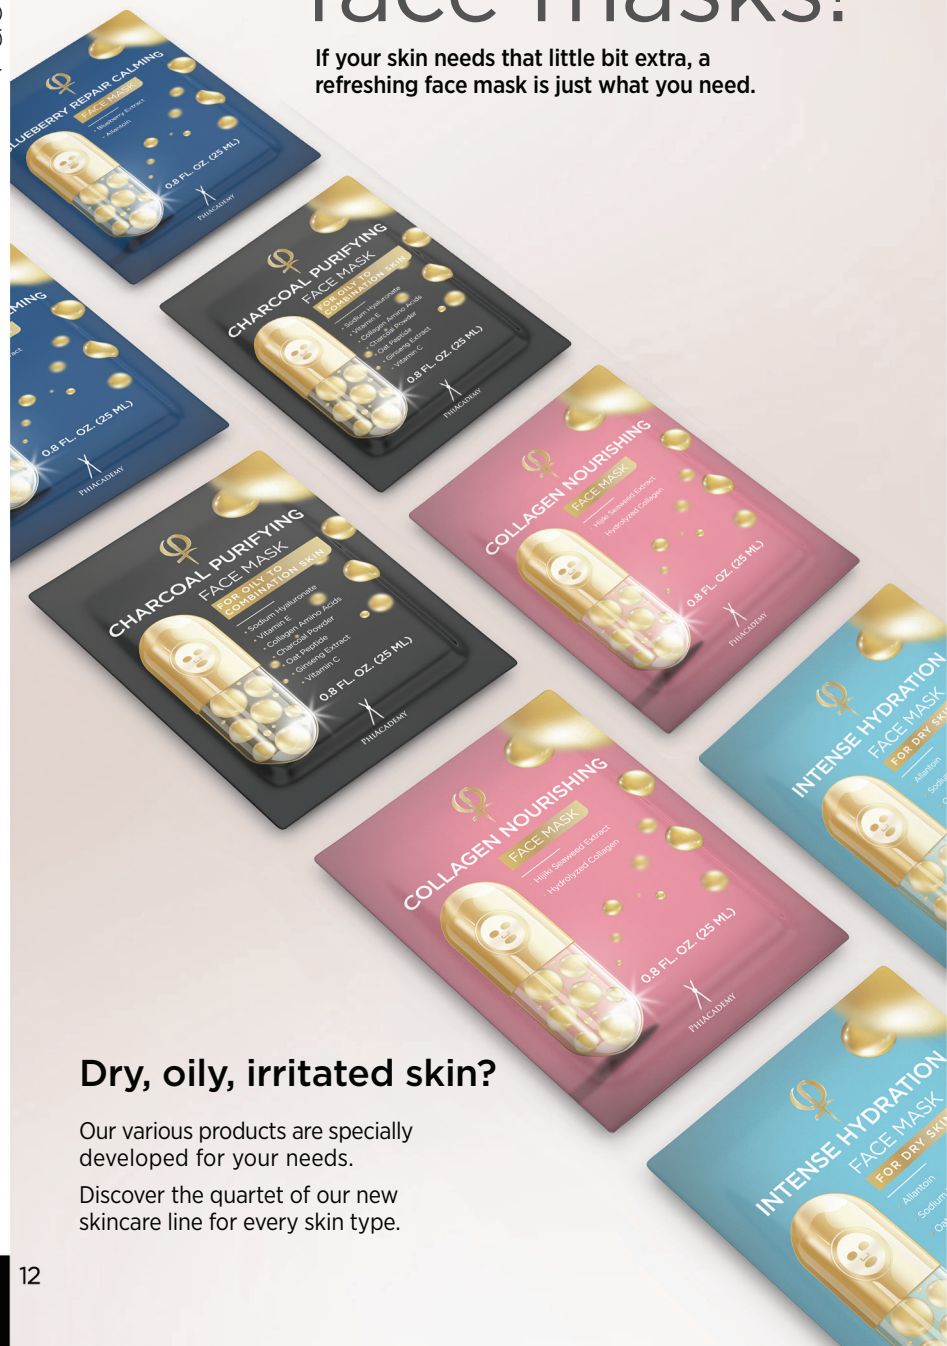

- PHIBROWS Fox SUPER
- PHIBROWS Brown 1 SUPER
- PHIBROWS Brown 2 SUPER

- PHIBROWS Brown 3 SUPER
- PHIBROWS Goldenbrown SUPER
- PHIBROWS Black SUPER

2 pieces/pack

We ♡ face masks!

If your skin needs that little bit extra, a refreshing face mask is just what you need.

Dry, oily, irritated skin?

Our various products are specially developed for your needs.

Discover the quartet of our new skincare line for every skin type.

Blueberry

REPAIR CALMING FACE MASK

Your customers complain about irritated skin caused by sun, wind or other environmental influences?

Give them the opportunity to try the new Blueberry Repair Calming Face Mask, which has a pleasantly cool effect on the skin. Together with allantoin, which is known for its repairing qualities, the mask gives your skin a healthy appearance.

Charcoal

PURIFYING FACE MASK

What if your customers could get fresh and clear skin - in just 15 minutes?

The Charcoal Purifying Face Mask contains:

- natural charcoal
- vitamin C
- vitamin E

These ingredients help to remove impurities from the skin and regulate the skin's moisture-oil balance. They clear blocked pores, absorb toxins, reduce skin aging and ensure flawless and clear skin!

Collagen

NOURISHING FACE MASK

Your customer is king!

Through the Collagen Nourishing Face Mask, which protects and repairs the skin with hydrolyzed collagen, your customer can feel like a royal for at least 20 minutes. The formula helps to rebuild strength and elasticity and improves the appearance of fine lines and wrinkles.

Intense

HYDRATION FACE MASK

Would you like to offer your customers the perfect face mask for dry skin?

The Intense Hydration Face Mask maximizes the skin's moisture level.

• Hyaluronic acid and • natural ingredients

refresh the skin and provide dry areas with an extra portion of moisture. Let your customers shine!

Did your customers already try the Jive & Tango Face Masks?

There is a solution for every skin type and they are the perfect complement to various beauty treatments.

- Matting of oily skin
- Hydration of dry skin
- Anti-blemishes, acne & scars
- Lightening of hyper pigmentation

Jive and Tango

GRAND MASTER *Blades*

#18 NANO BLADES

&

U24 NANO BLADES

The GRAND MASTER blades consist of 18 or 24 needles, each 0.15 mm thick. The even distance between the needles ensures excellent application. The blades leave the thinnest lines you've ever seen by applying minimal pressure to the skin while working. The blades are made of 304 stainless steel and are the firsts to be polished using laser technology.

PhiLaser

PhiLaser Type-HC:

The PhiLaser Type-HC is a laser device with electrolysis system that permanently removes single hairs and capillares.

A treatment with this laser also improves the texture and skin tone. Through such a laser treatment, it is possible to non-invasively and non-surgically build up the skin and remove unwanted hair and capillares at the same time.

Type-HC enables effective, non invasive and non-surgical treatment with skin rebuilding benefits for a smoother and more even skin. Optimal for those who want to offer skin care treatments using the latest technology for their clients.

With the purchase of the machine you also get unlimited access to the CraftMaster online manual for the correct use including hints.

PhiLaser Type-V:

A laser therapy with the PhiLaser Type-V is the most effective way to treat vascular veins and improve the overall skin condition by reducing visible imperfections of this type.

The vein removal treatment is a great solution for unwanted veins, diminishing the appearance of multiple types of veins including, spider veins and reticular veins with no incisions and minimal discomfort. It also removes broken capillares and blood vessels on the face.

This machine uses the latest technology to coagulate the skin vessels without the need for uncomfortable injections.

Compared to vein ligation and stripping, a treatment with the PhiLaser Type-V is more comfortable and painless for the client. In addition, the recovery process is also shorter and outstanding results are achieved overall.

Babor Spot Reducer:

New dimension in skin therapy!
The Babor Spot Reducer is a device used to treat the following:

Hyperpigmentation, age spots,
keratosis papilomas, fibromas,
warts, cherry angiomas, sun spots

BABOR SPOT *Reducer*

Babor Spot Reducer uses CO2 gas and freezes the water in the cells and between the cells through extreme cold. In a few seconds, unwanted superficial lesions are destroyed.

Advantages of the Babor Spot Reducer:

- › The therapy takes much less time
(treatment sessions last less than 2 minutes)
- › No anaesthesia is required as it is practically painless
- › It is one of the least invasive lesion treatments on the market
- › It is used to treat nearly any benign skin lesion

No matter whether wart removal, verruca treatment or age spots removal, make your client feel comfortable - with the Babor Spot Reducer.

PhInjection:

The PhInjection Pen is an innovative device used for cosmetic treatments to help with smoothing wrinkles and increasing lip volume to a new level. It allows hyaluronic acid fillers to be applied completely injection-free.

The PhInjection Pen works in such a way that the hyaluronic acid is not inserted with a needle, but is sprayed into the appropriate area by pressure.

This method guarantees the best possible lip volume treatment and wrinkle removal.

Hyaluronic acid is evenly spread throughout the epidermis and attracts water molecules, resulting very quickly in the relief of lines and wrinkles.

The effect is immediately visible. You will notice that, unlike other devices on the market, the PhInjection Pen doesn't have a lever.

By using innovative technology in the pen mechanism, the distribution of the preparation is faster, easier, more efficient and very precise.

Works in synthesis with hyaluronic acid fillers, for durable results and long lasting satisfaction.

Warranty: 6 months

Kit contains:

1x PhInjection Pen

1x Blackhead Remover

**6x Ampoules
+ Adapters**

PhInjection PEN

PhiX is a simple metal tool that enables you to fix PhiBrows Pencils while sharpening. This product should be cleaned with alcohol after use and it can be sterilized in an autoclave.

It is an excellent tool for inexperienced beginners, for assistants in salons, as well as for professionals.

PHI ION *Pro*

Due to the high degree of carbonation, the following skin issues can be ideally treated with it:

- Moles
- Warts
- Spots

It is based on the transmission of a controlled amount of energy through ionisation of the air. Extremely fine pen triggers prevent skin injuries and ensure a painless treatment.

The new Phi-Ion Pro takes your technique to a completely new level!

It is a revised and improved version of the Phi-Ion.

The Phi-Ion Pro is a very advanced non-invasive skin tightening and rejuvenating device, ideal for treating wrinkles and sagging skin.
